Figur 9

Figur 10

Western blot analysis showing protein expression levels over time. The blot is divided into two sections. The top section shows bands for 110 kDa, 60 kDa, and 35 kDa, with a control lane. The bottom section shows a band for 75 kDa, with a control lane. The time points for the top section are 0 sec, 30 sec, 1 min, 2 min, and 5 min. The time points for the bottom section are 0 sec, 30 sec, 1 min, 2 min, 5 min, 10 min, and 15 min. The bands for 110 kDa, 60 kDa, and 35 kDa show a decrease in intensity over time, while the 75 kDa band shows an increase in intensity over time.
